- 6.** Premium travelator Ø 125
- 10.** LC with brake Ø 100
- 11.** LC with brake Ø 125

The structure, the design, the features are those of our historical articles; the essential difference is the depth of the basket, which is particularly reduced here.
This solution allows the trolley to be emptied more easily avoiding uncomfortable postures, and makes the trolley lighter, so that it is easier to handle and more practical.
KEITA is recommended for handling goods inside, garden centres or DIY stores. It is especially suitable for use by elderly and disabled persons.
